Brand New. All For You.

Introducing Electronics Repair & Return from John Deere

Skilled technicians. Quick turnaround. Competitive pricing. It's **what you need** when electronics go on the fritz and what you get from Electronics Repair & Return by John Deere Reman.

Now available, this convenient service offers you a **true John Deere solution** for the OEM repair of some of your most important electronic components*. And better yet, it's all backed by a valuable 12-month Limited Warranty** that's sure to please.

So, moving forward, turn to John Deere for electronics repair and be rewarded with **fast, reliable service** to get your machine up to speed again.

JOHN DEERE

Visit your dealer
today to learn more.

* The John Deere Reman Electronic Repair & Return program services the following products at this time: StarFire™ 3000 Receiver and GreenStar™ 1800, 2600 and 2630 Displays.

** The John Deere Reman Electronic Repair & Return 12-month Limited Warranty covers specific repairs on each component as noted on the Service Repair Card received with repaired unit. John Deere Reman will repair or replace unit during the applicable warranty period but is not responsible for any labor costs associated with the removal and installation of the components.

JohnDeere.com/Reman

Hi there. I'm an off-brand battery. You can usually find me hanging out online or at the auto parts store. You might even get a pretty good deal if you want to give me a home. But I'll warn you: after a little while, I don't have much of a work ethic. And when it's cold outside, I may not keep a charge. Just too much effort. But don't worry... before too long it'll be time to buy a new me anyway. Hopefully you won't be planning anything important that day.

Don't Risk It.

Off-brand batteries are not **StrongBox™ Batteries**. StrongBox Batteries are engineered by John Deere and last up to eight times as long*. *Don't Risk It with lesser brands.*

*BCI group 31 competitive comparison test completed on January 2012 by independent test laboratory JBI Corporation to SAE specifications.

Make your peace of mind last.

When you buy John Deere equipment, you get one of the best warranties in the business. With the PowerGard™ Protection Plan Residential, add up to four years of coverage beyond the normal warranty term on all utility vehicles, riding lawn equipment, zero-turn radius mowers, and compact and utility tractors. You'll get extended protection with **\$0 deductible and no out-of-pocket costs on covered repairs**. Plus, transportation for factory warranty and extended protection repairs is covered!

If you decide to sell or trade your equipment before the end of the coverage term, the remaining coverage is fully transferable to the next owner. Lower cost, low-deductible Powertrain and Engine Protection Plans are also available.

Call or stop by today so we can customize your peace-of-mind plan.

JohnDeere.com/PPPR

Nothing Like Doing It Yourself

When your equipment is in top condition, putting it to use can be a pleasure. John Deere Home Maintenance Kits contain almost everything you need to tune up your machine in one convenient package. Available for most John Deere lawn tractors. Also compatible with other manufacturers' equipment with compatible engines. See your owner's manual for suggested routine maintenance.

Find your Home Maintenance Kit at
JohnDeere.com/HMK and order online at JDParts.com

Tune Up and Head Out

No need to take your machine to the shop for a tune-up. Our Home Maintenance Kits make it easy to tune up your lawn tractor or Gator™ by providing almost everything you need in one convenient package:

- 2 quarts oil ▪ 1 oil filter ▪ 1 air filter
- 1 fuel filter ▪ Air precleaner ▪ Spark plugs

Check out some of our kits below. If you don't see your machine listed, don't worry. There are many other kits available. See us to get the appropriate kit for your machine.

AM145350	X300 and X500 Select Series Tractors	\$138.44	\$124.60

John Deere Fuel-Protect Gasoline Stabilizer

Blended fuel attracts water from the air, which causes corrosion to fuel tanks, fuel lines, carburetors, and injectors. John Deere Fuel-Protect contains double the corrosion preventer to help fight these damaging effects. Pumped gasoline starts to degrade immediately, causing varnish deposits to build in engines. This results in starting problems, poor performance, and reduced engine life. Adding John Deere Fuel-Protect keeps fuel fresh for 12 months, more than doubling the storage life of fresh gasoline. John Deere Fuel-Protect also eliminates the need to drain fuel prior to storage.

NUMBER	DESCRIPTION	LIST
TY27534	Fuel-Protect for Gasoline, 8-oz.	\$ 4.49
TY27535	Fuel-Protect for Gasoline, 32-oz.	\$12.99

Heavy-Duty Brush Guard

Keep your tractor free from scratches and scrapes with our front-end brush guard. With its welded construction made of large-diameter tubing and thick steel plates, it provides superior protection for the front grille, lights, and hood.

John Deere OE Engine Overhaul Kits

Here are some examples that make the John Deere OE engine overhaul kits the “Best” choice. John Deere liners are heat-treated to a precise hardness and depth to increase durability and life. Proper heat-treat hardness provides a hard surface with good wear characteristics. Pre-assembled piston liner kits eliminate the chance for broken or improperly installed piston rings, which can cause power loss, oil consumption, and excessive wear, leading to seized pistons and potentially premature engine failure. Fiber-reinforced piston bowl rings provide more than twice the yield strength of aluminum alloy and increase the operating pressure and temperature range without the risk of cracking. John Deere uses two layers of metal alloy on the ID face of the main bearings to protect them from the constant rotational forces of the crankshaft.

*Expanded engine overhaul kits include rod bolts, rod bushings, piston pins, and camshaft bushings.

Standard Kit:

- Rod, main, and thrust bearings
- Thrust washers
- Oil pan split gasket
- Factory assembled piston/liner kits
- Liner packings
- Front and rear seals
- Gasket rings
- Snap rings

Expanded Kit:

- Standard kit contents
- Rod bolts and bushings
- Piston pins
- Camshaft bushings

Overhaul Kits to fit OEM Engines

John Deere engines are the trusted power source in not only agricultural equipment, but also construction, generator drive, marine, and other off-highway applications. When it comes time to overhaul your John Deere engine, choose a kit that provides the same quality and performance you engine had when it left the factory. Only John Deere overhaul kits contain the genuine components that are manufactured and tested to the latest John Deere specifications.

Tractor Belts

Top surface

- Special rubber surface—for high wear resistance

Embedding compound

- Highly adhesive rubber compound layers—for excellent stability of the v-belt

Tension cord

- Low-stretch polyester cord—for highest stability
- Extreme tensile strength

Base compound—low profile height

- High flexibility
- Excellent heat radiation—for maximum lifetime
- Good performance even in the serpentine drive of the engine idlers

Sound-Gard® Body Upholstery Kits

Beltline, post, and headliner kits are available as replacement parts for row-crop, 4WD, and utility tractors with Sound-Gard bodies. Made of pre-cut brown or black original equipment upholstery/insulation material for a precise fit. Two foam parts have been added to the row-crop kits to improve the fit behind the seat. Insulation is a full two inches thick in key areas for greater sound-deadening capacity.

R Series cab bracket kit

The R series cab bracket kit is available for mounting monitors, phones, displays, and mounts to existing holes inside the cab. Fits 7–9R series tractor cabs.

RE317435

Price – \$141.90

Sale Price – \$130.49

Mounting bracket kit – long bar and tray kits

The accessory mounting bracket with optional tray kit provides a low-cost solution to all your mounting needs in the cab. Fits 7020, 7030, 8010–8030, 9020, and 9030 series.

BRE10141 Bracket Kit

Price – \$89.10

Sale Price – \$80.19
BRE10142 Tray Kit

Price – \$63.80

Sale Price – \$57.39

CommandARM bracket

The CommandARM bracket offers a safe and convenient way to mount a mobile device or tablet to the CommandARM on 6R–9R FT4 tractors. Includes bracket and hardware only.

BRE10147

Price – \$47.30

Sale Price – \$43.49

RAM® self-leveling cup holder

Keep your favorite beverage within reach and prevent spilling on even the steepest grades with this self-leveling cup holder.

BRE10152

Price – \$64.90

Sale Price – \$58.39

Cell phone bracket kit

The RAM X-Grip® bracket's four-leg design offers great holding power, without covering your phone's screen.

BRE10015

Price – \$67.10

Sale Price – \$60.39

(FITS THE W235 AND W260)

RAM tablet mount kit

This kit's high-strength design keeps your tablet secure, without restricting access to audio jacks or USB or other ports.

BRE10255

Price – \$92.40

Sale Price – \$83.19

Accessory mounting bracket kit

Mount, adjust, and position key controls and displays within the cab for maximum accessibility without compromising visibility. The new John Deere design can be used in multiple configurations and tailored to the specific machine and task.

* Fits Hydrostatic Transmissions only, not for PowrReverser™ Transmissions.

Going toe-to-toe with old man winter just got a little bit easier.

The Mauser Deluxe Drop-on Cab for the 1025R and 2025R

Two of the most rugged and versatile tractors on the market, the 1025R and 2025R subcompact tractors, can take on blustery, snowy conditions with the simple addition of a durable, corrosion-resistant Mauser Deluxe Drop-on Cab* from John Deere.

Offering full glass doors and dual exterior mirrors for maximum visibility, the Mauser cab is loaded with operator-friendly features including a windshield wiper/washer system, heater, fan, electronic switch console, sun visor, interior light, and coat hook. Better yet, the doors are removable, and the front and rear windows extend nearly 90 degrees for warm-weather operations.

1025R Cab: LP68087

2025R Cab: LP70009

See us before the snow falls to learn more.

* A retrofit kit (LP68119) is required for 1025R models manufactured prior to the 2016 calendar year.

OPTIONAL CAB KITS

1025R Optional Kit Components:

- Rear Wiper Kit: LP68115
- Stereo Kit: LP68120
- Beacon Light Kit: LP68116
- LED Rear Work Light Kit: LP68117
- Illuminated License Plate Kit: LP68118

2025R Optional Kit Components:

- Rear Wiper Kit: LP70011
- Stereo Kit: LP70016
- Beacon Light Kit: LP70012
- LED Rear Work Light Kit: LP70013
- Illuminated License Plate Kit: LP70014

Add more Do more with John Deere Loader and Bucket Attachments

General-Purpose Bucket

Compatible with reversible and replaceable cutting edges. Durable bucket with full-length side cutting edges, additional bottom skid plates, and a double-reinforced top section.

High-Volume Bucket

Designed for use with lightweight material such as mulch, feed, silage, snow, and chicken manure.

Material Bucket

Available to match tractor-loader applications. Can be used for loading dirt, gravel, feed, and light materials as well as scraping, digging, and other general-purpose work.

Heavy-Duty Bucket

Recommended for heavier-use applications, such as commercial operations. Cutting edge has pre-drilled holes for replaceable cutting edge.

Heavy-Duty Bucket w/ Grapple Brackets

Same as Heavy-Duty Bucket and includes brackets for grapple attachment.

Grapple Bucket

Ideal for handling full loads of silage, manure, and bales weighing up to 1,000 lbs. (453 kg).

*Talk to us today about how attachments can **Add More** to your loader experience.*

Digging Teeth

Can be added to Heavy-Duty Bucket for easier digging in hard ground or breaking loose hard-packed materials such as manure or silage. Not compatible with replaceable cutting edge.

Tooth Bar

Tooth bars help penetrate hard-packed material. Attach to bucket by sliding over the cutting edge. Retained by two bolts, one in each end plate of bucket.

Replaceable Cutting Edge

Cutting edges are recommended for use when scraping on concrete or other abrasive materials. Replaceable, reversible cutting edges protect the welded-on cutting edge of the bucket.

5-Tine Grapple

For operators who need increased durability and load-carrying capacity. Equipped with twin cylinders for superior clamping force. Compatible with John Deere 600/700/800-style and global-style buckets with grapple brackets shown installed on bucket.

Finger-Pickup Seed Meters

Save time and money by checking meters before you go to the field. For smoother operation, the finger-pickup assembly should be dimensionally correct and fit flush against the carrier plate. Proper finger-spring tension is another essential for good meter performance. Replace stretched or broken springs as needed; also, check for wear on seed belts and replace as needed to ensure peak performance.

WHAT ARE WORN PLANTER PARTS COSTING YOU?

Have you ever calculated your seed investment for a 10-hour day of planting?

Let's look at a hypothetical example: A corn grower with a seeding rate of 34,000 plants per acre on 30-inch rows with a 24R30 1775NT is planting nearly 1.3 million seeds per hour at 5.5 mph or 2.3 million seeds per hour at 10 mph.

Assuming a bag of seed costs \$274...

$$\begin{array}{l} \$274 \\ \text{bag of seed} \\ \text{(approximately $.0034 per seed)} \end{array} = \begin{array}{l} \$3,033/\text{hr planting} \\ \text{@ 5.5 mph} \\ \$5,518/\text{hr planting} \\ \text{@ 10 mph} \end{array}$$

Both figures calculated at an average field efficiency of 70%.

Either way ... in a 10-hour day of planting, that's a BIG investment.

With that many dollars in seed going through your planter meters each hour of the day, isn't it worth the cost of a meter inspection to ensure you get the most out of that investment?

Don't let worn parts wear on your bottom line.

Schedule your John Deere Certified Meter Inspection today!

JDParts.JohnDeere.com

JOHN DEERE

RowCommand™

RowCommand positions you to cut seed costs and put an end to overlapping with superior accuracy. An electric clutch on each row—along with an in-cab controller—enables you to set up 16 different sections.

See your John Deere dealer for more information on the parts required for your specific machine configuration.

Active Pneumatic Downforcew

With John Deere Active Pneumatic Downforce, planting accuracy becomes much easier. A hydraulically driven compressor syncs with the SeedStar™ 3 HP and SeedStar XP systems to automate downforce control. Just set the row-unit target margin value, and the active pneumatic downforce system works automatically—ensuring your planter maintains precise soil penetration and consistent depth without sidewall soil compaction.

See your John Deere dealer for more information on the parts required for your specific machine configuration.

Easy Adjust Row Cleaners

With Easy Adjust row cleaners on ExactEmerg™ planters, operators have a pneumatic solution to make on-the-go adjustments that are controlled directly from the seat of the cab. They can be raised from the cab with the push of a button for wet areas, waterways, or end rows. Row cleaners play a major role in maximizing yield toward uniform emergence, reducing row-unit bounce, and maintaining proper depth. They also provide quick solutions to customize your planter in variable field conditions.

See your John Deere dealer for more information on the parts required for your specific machine configuration.

Ask us today about configurations for your planter!

Closing Systems

Rubber Tire Wheels

Recommended for most conventional, minimum-till, and no-till planting conditions. The spacing between the wheels is adjustable so the closing system meets the needs of those planting small seeds at shallow depths. The wheels can also be staggered fore-and-aft to enhance residue flow. Four levels of spring force are available and set easily with the integrated T-handle adjustment.

BA28966 LIST \$397.10 NOW \$349.39

Cast Iron Wheels

Recommended for use in tough soil conditions where additional closing force is required. The cast wheels are installed in place of the rubber tires on the same frame structure and feature force adjustment similar to the rubber tire closing system. The spacing between the wheels is adjustable and may be staggered fore-and-aft to enhance residue flow. The cast wheel closing system is not advised for use in tilled conditions.

BA28967 LIST \$463.10 NOW \$407.49

Disk Closing System

Recommended for very shallow planting depths. Two small disks are used to gently firm soil around the seed and are followed by a wide packer wheel to gently pack the soil surface. This system is not advised for use in high-residue applications.

BA27006 LIST \$863.50 NOW \$759.89

Drag Closing System

Recommended for use in soils that are prone to bake and crust after planting. These conditions are primarily found in cotton planting in the southwest. A small wheel is used to gently firm seeds in the bottom of the seed furrow. Drags follow the wheel action to further loosen soil over the top of the seed to level the soil—leaving a surface that is resistant to crusting.

BA26830 LIST \$572.00 NOW \$503.39

MaxEmerge™ 5 Retrofit Kit

Get the versatility you need for your row unit with the ME5 Retrofit Kit. Loaded with the same great options as a MaxEmerge 5 Planter, the kit allows you to upgrade your earlier model planter with new equipment to enhance your operation.

Key features include:

- Mini hopper with straight CCS hose entry for better seed flow
- Clean air vacuum for a debris-free environment to increase meter efficiency
- Improved double eliminator to achieve more precise settings for various crop sizes
- Easier access to meters

Retrofit compatible with 1720 CCS, 1770NT CCS, 1790, and DB CCS Pro-Series Planters (MY05 and newer).

ProSeries™ Opener Retrofit Kits for 90 Series Openers

The ProSeries Opener offers agronomic advantages and extended wear life compared to the current 90 Series openers.

Features include:

Seed boot – A narrower, tighter fit to the disk results in less soil throw for better seed-to-soil contact and extended wear life.

Press wheel – Narrower and more flexible press wheel improves overall seed-to-soil contact for more even emergence, plus upgraded double-row ball bearing extends service life.

Serrated closing wheel – Improved closing system when seeding in harder, drier conditions. The notches on the wheel break up the drier soil for better germination.

Seed tab – Improved material for longer wear life, angled and more flexibility in the seed trench results in less seed bounce for more consistent seed placement.

Closing spring – Easier adjustments.

DiamondTough™ Baler Belts

Work harder, smarter, longer

John Deere DiamondTough baler belts are carefully crafted to:

- Handle heavy shock loads
- Maintain consistent belt length
- Offer improved reliability and belt life, minimizing downtime
- Be more puncture- and tear-resistant than other belts
- Warn you when it's time to replace them

Better inside

Patented triple-weave design incorporates nylon, polyester, and monofilament cords. DiamondTough belts are more puncture- and tear-resistant, improving belt life and reducing downtime.

Better outside

DiamondTough baler belt's self-cleaning, three-step tread design offers benefits at every layer, including wear indicators.

- **Top step:** Provides excellent stem contact during initial wear stages.
- **Middle step:** When the top step is worn, bale starting may be adversely affected in certain crops.
- **Bottom step:** When the top two steps are worn, replace the belt.

Ask us for the correct fit for your round baler today.

*Offer valid November 1 – December 31, 2018. Offer valid only after the completion of a John Deere inspection.

**Offer valid on new belt purchase made through your local dealer.

See us for more details.

Bale Mobile App

Yield data is now available for hay, thanks to the Bale Mobile app. The One Series Large Square Balers measure moisture and weight for each bale. This app takes that real-time information to a whole new level, whether baling, loading, or in the office managing. The moisture and weight are tagged to the individual bale. If a bale is too wet, the operator can immediately decide whether to apply preservative or even stop baling. Bale Mobile also has the option to tag bales so they can be easily identified when sorting. After baling in a field, a summary will show the crop, number of bales, and average moisture, even if there is more than one baler running. It gives users the option to sort by moisture, weight, whether preservative has been applied. It can also help to load trucks for optimal weight. This documentation can even be shared with landlords and trusted advisors.

Hardware and compatibility requirements:

- iPad Air® 2 or newer tablet
- One Series Large Square Baler
- Bale Mobile Hardware kit
- Tractor with StarFire™ receiver

Advanced Hay, Straw, and Silage Tester

This newly advanced Hay, Straw, and Silage Tester is the most efficient probe on the market. The 20" stainless steel probe and tip provides accuracy, versatility, and durability. The SW07305 will measure push force to determine whether it's a high or low density bale, then adjusts the moisture result for more precise accuracy.

Features:

- Measures 8–72% moisture content
- Temperature range 32–185°F (0–85°C)
- Automatic Density Compensation
- Choice of hay or straw bales, separate mode for silage
- Memory can store results up to 64 bales with a total of 1,000 savable moisture and temperature readings
- Continuous reading as you probe bale

Trigger a chain reaction

Make your cornhead stronger—and last longer—with **RowMax**, a new retrofit solution from John Deere.

Designed exclusively for the 700C/FC cornheads and available as a retrofit for MY12-600C/FC cornheads, RowMax **boosts row unit life by up to 50%** with an advanced gathering chain featuring 12 additional links, two more sprocket teeth, and upgraded solid alloy bushings. In addition, if you replace your worn stalk rolls with opposed or intermeshing stalk rolls, you'll get 25% more wear life thanks to an improved wear coating.

Cover more territory on your farmland—and lower lifetime ownership cost—by upgrading your cornhead with an innovative RowMax retrofit kit from John Deere.

Avoid those “Oh-No” moments with a Combine Inspection from John Deere

What’s worse than a combine malfunction during harvest season? Not much. That’s why you should schedule a comprehensive combine inspection from John Deere soon.

As diagnostic experts, our experienced technicians can remedy potential problem areas on your combine before you trek out to the field. From cab and control system to engine and feederhouse area, you can be confident that your combine will be in tip-top condition after a multi-point inspection.

**Schedule your combine inspection
with us today.**

OUR INSPECTIONS INCLUDE “THE WORKS”

A John Deere Expert Inspection covers 180 inspection points including:

- Control System
- Feederhouse Area
- Feed Accelerator (fast)
- Combine (left/right sides)
- Engine Compartment
- Grain Tank Section
- Cab
- Safety

Save Time AND Get Accurate Yield Data with the ActiveYield™ Retrofit Kit

Manual calibrations can take up to 90 minutes, but with ActiveYield, it's done with no time or effort away from harvest—and will save you time every day.

Save \$300 on ActiveYield retrofit kits thru 2/28/19*

With ActiveYield, automatic calibrations occur all day long, eliminating time-consuming manual calibrations. ActiveYield senses the weight of the grain in the tank as it fills. The combine uses the weight information to continually calibrate the yield system.

That means you can make real-time decisions without leaving the cab. Plus, it gives you more accurate yield mapping.

NUMBER	DESCRIPTION	LIST	NOW

ARE WORN NOZZLES COSTING YOU?

Spray nozzles are some of the smallest and most overlooked pieces of equipment on a sprayer, but they have the greatest effect on accuracy, efficiency, and drift potential. Worn spray nozzles can increase application rates and/or change distribution patterns, causing under- and over-application and impacting your bottom line.

WORN NOZZLE SPRAY PATTERN

UNDER-APPLICATION

- Reduced yield
- Inadequate weed, pest, or disease control
- Repeated trips over the field

OVER-APPLICATION

- Increased input costs
- Crop damage

NEW NOZZLE SPRAY PATTERN

Land the right drop on the right spot with the ExactApply™ retrofit kit

Make every drop count with the ExactApply Nozzle Control System from John Deere. Available as a retrofit for R4030, R4038, and R4045 models, ExactApply features individual nozzle control for precise droplet sizing systems and consistent application management.

Providing you with three times the pulsing frequency of competitive systems—and an industry-exclusive AutoSelect A/B nozzle design—ExactApply maintains your target rate and pressure over a wider range of speeds along with decreasing overlap, reducing input costs and elevating productivity.

Put an end to over-application, crop burn, and off-target drift with ExactApply.

RECEIVE
\$2,500 OFF*
ExactApply Retrofit Kit
(R4030, R4038, and R4045 models)

*\$2500 off the purchase of John Deere ExactApply Retrofit Kits (including boom, alternator, chassis harness, and software) made between November 1, 2018, through April 30, 2019. Valid only at your local, participating John Deere dealer. To be eligible for the \$2500 retail discount, a valid original sales invoice dated between November 1, 2018, through April 30, 2019, must be presented and ExactApply must be installed by the John Deere dealer. Dealer participation may vary. Other restrictions may apply. See your John Deere dealer for details. Offer may be discontinued or modified without notice at any time. Offer cannot be combined with any other offer.
Note to Dealer: See parts bulletin # 061726 for promotion details and redemption information

Every Drop Counts

New Quick Change Nozzles with ExactApply™ Compatibility

10% OFF*

Low-drift Max (LDM)

This nozzle is ideal for post-emergence systemic applications.

- 120° wide and 60° thick pattern provides optimum coverage while maintaining overlap at low boom heights
- ExactApply 15Hz PWM, 30Hz PWM, and A/B AutoSelect compatible
- Dual pre-orifice nozzle delivering Coarse, Very Coarse, and Extra Coarse droplets to reduce drift

NUMBER	DESCRIPTION	LIST	NOW
PSLDMQ2006	Low-drift Max Quick Change Nozzle	\$10.83	\$9.69
PSLDMQ2008	Low-drift Max Quick Change Nozzle	\$10.83	\$9.69
PSLDMQ2010	Low-drift Max Quick Change Nozzle	\$10.83	\$9.69

Low-drift Twin (LDT)

This nozzle is ideal for plant health and contact herbicides.

- Twin 30° forward- and rear-facing dual angles for superior coverage
- ExactApply 15Hz and 30Hz PWM compatible
- Medium and Coarse droplets across wide operating range and sizes to meet speed/rate needs

NUMBER	DESCRIPTION	LIST	NOW

On the straight and narrow.

Sure, with John Deere Precision Ag components installed on your equipment, you'll have straighter rows, lower input costs, and an easier time harvesting. But you know when our Precision Ag technology really shines? When your neighbor stops by to ask how you planted such a good-looking field. So, whatever equipment you're planting with, we have a solution to make your fields the envy of your neighbors.

Guidance and Machine Control Kits

AutoTrac™ Integrated Machine Kits make it easy for you to be Precision Ag-ready when the time comes. The AutoTrac kits include the appropriate machine steering controller (when necessary) and AutoTrac control-ready accessories. Complete the system with display, receiver, and software (sold separately). These field-installed kits are an integrated guidance solution for John Deere Tractors and compatible with GreenStar™ 3 or GreenStar 3 system components.

Tillage Sweeps for All Your Needs

John Deere offers a portfolio of tillage parts to meet your needs and budget. When it comes to sweeps, you can choose the value of the conventional wing design, the width retention of Tru-Width™, or the superior performance of High Productivity sweeps. We can help guide you to the best option for your operation. Stop in today and ask us about genuine John Deere tillage parts.

Conventional Wing Sweeps

These conventional wing sweeps provide excellent soil mixing and residue retention. The wing ends are clipped for minimum soil side throw. The design provides an excellent option for the lowest cost investment.

Good

Tru-Width Sweeps

Available in both bolt-on and Perma-Loc™ styles, the Tru-Width sweeps help maintain cutting width throughout the life of the sweep. With its wraparound design, Tru-Width sweeps provide even draft and maximum holding power. Compared to the conventional sweeps, Tru-Width sweeps are the choice for growers who require optimal scouring in sticky or wet soil.

Renew your disk harrow with genuine OEM parts

Managing crop residue and distribution in any field condition is vital for optimal yield. Inspect your disk harrow today and replace worn components with John Deere genuine OEM parts to ensure performance.

- **Disk Blades** – John Deere Diamond Series disk blades are made of micro-alloy steel and heat treated to maximize wear resistance while ensuring flexibility and impact absorption
- **Scrapers** – high-strength, heat-treated steel for longer life and to help prevent wear on the blade
- **Bearings** – manufactured and tested to stand up to extreme use
- **Spools** – OEM designed to handle constant hammering to the gang and prevent flexing when an obstacle is struck
- **Sleeves** – made of high-carbon seamless tubing for long wear life
- **Gang Bolts** – made of high-carbon, heat-treated steel to prevent bending and boxing

See us today so we can help you keep your disk harrow in top shape.

John Deere Diamond Series Disk Blades

- Made of reliable, long-lasting steel for high-performance disking
- Precision-sharp edges for proper residue cutting and sizing
- Made in the U.S.A.

Combination Wrenches

Fully polished or satin-finish nickel-chrome plated to resist rust and corrosion.

- A unique radius-corner design that allows contact with the flats, rather than with the points—providing additional torque strength and minimizing fastener rounding
- Stronger—providing less chance of slipping—ideal for frozen or rusted fasteners
- Hot-drop forged from chrome-vanadium alloy steel—ensuring maximum strength and toughness
- Lifetime warranty

John Deere Biometric Safes

Secure your valuables or handgun with a John Deere Biometric Safe. The JDX smart safes allow for quick and secure access with only a swipe of your finger. This is the most reliable biometric entry system available, with supreme accuracy and the lowest fail rate on the market. Speed counts! Entry using the Biometric swipe can be obtained in only seconds.

Speed and Security when you need it most. Don't settle when protecting your family... **trust the best, trust a John Deere Biometric Safe.** Made in the USA.

John Deere JDX-150 Biometric Safe

The JDX-150 has been designed to securely store your firearm until you need it. The heavy-duty 14-gauge steel vault has a reinforced latch specifically designed to resist prying attacks. The JDX-150 is designed to be portable, easily fits in an automobile, and includes a security cable.

- The most reliable Biometric system available
- Quick and secure finger swipe access
- 15-fingerprint memory
- Lighted interior
- Fits most handguns
- Weighs 9.5 lbs.
- Ext. dimensions: 12.5" x 8.75" x 2.25"

JDX-150

[See us for pricing.](#)

John Deere JDX-250 Biometric Safe

The JDX-250 is the larger of the two John Deere biometric safes. Designed similarly to the JDX-150 with the same 14-gauge body and anti-pry tabs. The JDX-250 has an auto-opening door—just swipe your finger and the door opens.

- The most reliable Biometric system available
- Quick and secure finger swipe access
- 15-fingerprint memory
- Lighted interior
- Fits most handguns
- Weighs 15.5 lbs.
- Ext. dimensions: 12.5" x 11.5" x 7"

*Heavy-Duty Mini Speakers (shown) sold separately.

Designed to be one of the most rugged stereos in the industry, this heavy-duty radio delivers high-quality audio while withstanding some of the harshest working conditions.

A AM/FM/WB/iPod®/iPhone®/ SiriusXM™ Heavy-Duty Radio

SWJHD1630

\$243.61 **\$219.25**

Boldly go where no radio has gone before.

The weatherproof Jensen SWJHD906BT radio brings news, weather, and Bluetooth™ capabilities to Gators, Skid Steers, and Open-Station Tractors. You get NOAA Weatherband with weather alert, AM/FM radio, Bluetooth playback, controls, and the ability for hands-free calling (external microphone SWJMICHP sold separately), and an input to play iPod, MP3 player, or portable CD player.

B Mini 906BT Radio

SWJHD906BT

*Heavy-Duty Mini Speakers (SWJXHD35) sold separately.

\$304.75 **\$274.28**

The SWJHD1365BT stereo is built tough for demanding environments while featuring the latest technological advancements. This radio features Bluetooth streaming audio (microphone included) with hands-free calling, giving you a truly hands-free experience. The iPod/iPhone capabilities can be taken advantage of via the USB so you can take your personal music library with you. Plus, the stereo is also SiriusXM-ready, offering you endless entertainment options.

C AM/FM/WB/iPod- & iPhone-ready/SiriusXM/ Bluetooth Stereo

SWJHD1635BT

\$289.99 **\$260.99**

We made the cab quiet. Now give your ears something to listen to.

If your cab radio is dead, dying, or just plain dysfunctional, consider an audio upgrade. Tune in to local news, weather, and sports, or bring your own audio stimulation via CD or MP3. Satellite news and music are also an option.

Pull in AM/FM and weather-band signals. This new heavy-duty radio has a full 7-channel NOAA Weatherband tuner and tells the time with the new segmented high-visibility display. It also comes with front Aux in capabilities and is equipped with a two-wire hookup that prevents battery drain when the vehicle is off.

D AM/FM/WB Heavy-Duty Radio

SWJHD1130

\$160.36 **\$144.32**

In today's modern heavy-duty market, having a radio built to survive the tough stuff doesn't mean that it has to sacrifice in-demand entertainment options. The SWJHD36AMIC features the ability to receive Bluetooth streaming audio and phone calls from a Bluetooth-enabled mobile phone, giving you a truly hands-free experience. The microphone required for hands-free calling comes standard with the radio. This state-of-the-art heavy-duty stereo also has NOAA 7-channel Weatherband tuner with S.A.M.E technology to focus on a more specific region, giving you more accurate weather updates along with being iPod- and SiriusXM radio-ready.

E AM/FM/WB/CD/USB/Bluetooth®/iPhone/ iPod/SiriusXM Stereo

ToughCam Digital Wireless Observation System

It's not X-ray vision—but it's the next best thing.

This one-camera digital observation system far exceeds the performance of any other analog system on the market. It features a WiSight signal so strong that it easily transmits through and around objects up to 60 feet away—with no interference.

Other benefits:

- Delivers a sharp, vivid picture with the 5.6-in. color LCD monitor
- Suction cup mount and 12-volt DC power plug for the monitor make this system easily portable among vehicles
- Wireless for easy and convenient setup

Applications:

- Tractors and round balers
- Sprayers
- Trucks and trailers
- Recreational vehicles
- Industrial
- Marine

Weld-on Hook

This weld-on hook is specifically designed for pulling, towing, or dragging heavy objects, with a working load limit (WLL) of 6,600 lbs. The designed use is for chain, but it can be used with rope or a tow strap. The hook is rated for Grade 70 chain, 5/16-in. or 3/8-in.

NUMBER	DESCRIPTION	LIST	NOW
TY27338	Weld-on Grabhook 3/8G70 6,600-lb. WLL	\$4.71	\$4.24

Working Load Limit is based off the hook being properly welded. The hook is not to be used for overhead lifting or to exceed the capacity of the bucket or equipment being used.

Trailer Chains

Tow with confidence when you add trailer chains to your vehicle. They act as a reliable backup system that will carry the load in the event your trailer separates from the ball or hitch. They'll even assist in bringing the trailer to a stop if necessary.

Use the Gross Vehicle Weight Rating (GVWR) of the trailer to determine which chains you need. Two chains are required and each individual chain must meet or exceed the total strength equal to the GVWR of the trailer, not the two chains combined.

NUMBER	DESCRIPTION	LIST	NOW
Class 3 & 4 Chain

80% Premium Ether Starting Fluid

A premium 80% Ether cold-weather starting fluid for all John Deere engines. Produces faster starts and incorporates an upper cylinder lubricant that provides a film of oil on cylinder walls to protect against dry starting.

NUMBER	DESCRIPTION	LIST
RE556468	80% Premium Ether Starting Fluid	\$4.00

Hand Cleaners

Sometimes hard work means getting your hands dirty. But when the job's done, it's nice to go home with clean hands. John Deere has a whole line of hardcore hand cleaners that will wash off even the toughest dirt and grime. All of our cleaners have these benefits:

- Non-toxic
- No chemical odor
- Multi-purpose uses (e.g., a stain remover for washable clothing, cleans tools, etc.)
- Contains only cosmetic-grade components and odorless mineral spirits (competitors use lower-grade components in their formulas)
- Milder than competitive products, leaving no skin irritation
- Includes skin emollients, lanolin, and glycerin

Multi-Purpose Spray Lubricant

Use this superior lubricant in hundreds of applications. It's a water-displacing, friction-reducing, light-penetrating oil. It prevents rust and also works well to free up parts already seized by rust, scale, or corrosion. Will not harm electrical contacts, wood, vinyl, or paint.

NUMBER	DESCRIPTION	LIST	NOW
TY6350	Multi-Purpose Spray Lubricant, aerosol	\$6.99	\$6.29

Penetrating Oil

An industrial strength, free-flow penetrant designed to quickly penetrate and loosen the toughest and most stubborn nuts, bolts, and parts. Preferred by mechanics and sure to work as hard as you do!

NUMBER	DESCRIPTION	LIST	NOW
TY26353	Penetrating Oil	\$4.49	\$4.04

Paint

We offer high-quality, long-lasting, colorfast paints that deliver all-weather performance for John Deere and all-makes equipment applications.

Lead-Free/Regular Enamel Paint

John Deere lead-free enamel paint is environmentally safe for both interior and exterior applications. Sets up in minutes and is tack-free in a few hours. Dries overnight to a hard, glossy finish that resists fading, cracking, and chipping.

Low-VOC Paint

John Deere offers a solvent-based paint to meet stringent volatile organic compound (VOC) state and federal regulations. Easily replaces the waterborne formula in similar applications.

- Provides a low viscosity of 2.8 VOC for easier spraying
- Requires only a moderate air-dry time
- Free of hazardous air pollutants

Fast-Dry Paint

Dries to the touch in one hour and requires minimal thinning for spray applications. Developed in a lead- and chrome-free formulation to protect against chipping, corrosion, and rust.

*See your dealer for additional sizes, colors, and paint accessories.

Still Better.

Plus-50™ II Engine Oil performs
above industry standards.

Perhaps you've heard, the requirements for engine oil compliance were recently raised to the new CK-4 standards. What's that mean? For those that use our Plus-50™ II Engine Oil, it means absolutely nothing. That's because Plus-50 II is still better than even the new standards, exceeding requirements before they even set the bar.

Go ask the competitive brand oils how it feels to play catch-up.
In the meantime, we'll just sit tight until the standards catch up to us.

Plus-50 II Engine Oil. Still better.
Still guaranteed. Still available only at your local John Deere dealer.

JOHN DEERE

Plus-50™ II Synthetic SAE 0W-40 API CK-4/SN Engine Oil

Synthetic Plus-50 II Premium Engine Oil (SAE 0W-40) has been designed to provide advanced lubricant performance in modern engines to meet the requirements of EPA regulations. SAE 0W-40 Plus-50 II is a full synthetic PAO (Poly Alpha Olefin) based oil that provides excellent performance.

Excellent for all diesel engines requiring 0W-40 viscosity and API Service Classification CK-4, SN, and Mack EO-N Premium Plus 03. Superior performance for customers who operate in extremely cold or hot conditions and want to maximize engine life performance.

Transmission and Hydraulic Oil

Hy-Gard™ oils are specifically developed to meet the exact requirements of transmissions, wet clutches, wet brakes, and hydraulic systems. Oils not meeting these exact specifications can compromise machine or component life.

Hy-Gard Oil

Available in 1-, 2 1/2-, 5-, 30-, 55-, and 220-U.S.-gallon containers.

- Recommended for equipment with common system reservoirs or separate transmission and hydraulic systems
- Exceeds JDM J20C specification

Low-Viscosity Hy-Gard Oil

Available in quarts and 1-, 5-, and 55-U.S.-gallon containers.

- Use in place of Hy-Gard oil in cold weather
- Exceeds JDM J20D specification

Bio Hy-Gard II Oil

Available in 5- and 55-U.S.-gallon containers.

- Made with farm-grown canola
- Biodegradable
- Use in place of mineral-based hydraulic oils

Synthetic GL-5 Gear Lube

Synthetic GL-5 lubricant is designed for severe on- and off-highway applications. Its superior thermal stability and oxidation resistance keeps gears and seals clean, while its thermal durability protects gears from physical damage by preventing heat-induced failure of anti-wear chemistry.

KEEP FUEL CLEAN

Protect your engine's fuel system and optimize machine performance with these simple precautions.

Bulk fuel filters

Protect stored fuel from contaminants by using John Deere fuel storage tank filters or Fleetguard® fuel island filters.

Engine fuel filters

John Deere fuel filters are matched to your machine to protect fuel system components like pumps and injectors.

Fuel maintenance

Improve fuel flow, clean injectors, and kill microbial growth by using John Deere fuel additives and conditioners.

Bulk Fuel Storage Filters

Protect your vehicle fuel systems from contamination and damage due to rust, dirt, bacteria, and water. Compatible with fuels containing up to 10 percent ethanol or 20 percent biodiesel blend.

The formula for staying in the field longer:

PLUS-50™ II ENGINE OIL
+ JOHN DEERE OIL FILTERS

500 HOURS* BETWEEN OIL CHANGES

Get great protection with fewer oil changes when you pair John Deere oil filters with premium Plus-50 II engine oil. Specifically designed by John Deere engineers for John Deere equipment, our maintenance products defend your machine from harsh conditions and wear, and provide you with up to 500 hours between drain intervals. That's twice as long as standard oil!

John Deere Plus-50 II engine oil and John Deere oil filters—it's a winning combination to keep your equipment in the field longer. See your local John Deere dealer today.

*500-hour drain interval applies to diesel John Deere engines when the following criteria are met: 1. Engine is equipped with an extended drain interval oil pan, 2. Machine operates with Plus-50 II engine oil, 3. Machine uses a John Deere oil filter, 4. Machine uses only ultra low sulfur diesel fuel.

Put It On My Multi-Use Account...

With the flexibility to add
a variety of John Deere

ATTACHMENTS

that help me increase efficiency
and productivity

And an easy alternative to cash
that allows me to pay for the

SERVICE

I need to avoid downtime

For convenient financing
