# 5E Utility Tractors 45 – 100 Horsepower Utility Tractors

#### **CONTENTS**

Introduction	2-3
5E Series	4-11
Attachments / Frontier / Loaders	12-13
Specifications	14-15

#### The 5E Series

MODEL	ENGINE HP	PTO HP*
5045E	48	36.6
5055E	57	38.9
5065E	65	48.3
5075E	75	57.6
5085E	85	70
5100E	100	85

\*5045E, 5055E, 5065E, 5075E PTO horsepower at rated speed Cab with 9F/3R SyncShuttle™ Transmission. 5085E and 5100E PTO horsepower at rated speed with 12F/12R PowrReverser™ Transmission

# The 5E Series Born to work

Meet the 5E Series by John Deere ... the only utility tractor truly born to take on tough tasks and keep coming back for more. With six models, 45–100 horsepower, open station and cab options, and Final Tier 4 compliant.

The 5E series in total now has 3 transmission options,
9F/3R SyncShuttle™ and 12F/12R PowrReverser™ in
the 5E 3 cylinder machines, and 12F/12R and 24F/12R
PowrReverser transmission in the 5E 4 cylinder machines.

Now you can have the rock-solid performance and versatility you expect in a John Deere – all at a price you might not.

#### Born to work... and work... and work

# Versatile. Powerful. Custom fit.

For lifting and loader work, rotary cutting, snow removal — even in hostile weather conditions — from property owners to weekend warriors ... conquer it all with the John Deere 5E Series.

If you thought you knew the 5E Series, take another look. You'll find new standard features and options that combine to create a full lineup of mid-spec machines that truly sits in a class of its own.

With 9F/3R SyncShuttle and 12F/12R PowrReverser available on 45-75 horsepower models and a 12F/12R PowrReverser and 24F/12R PowrReverser transmission available on 85 and 100 horsepower models you'll have all the power you need to take on the toughest tasks.

The comfortable open station configuration comes standard, or opt for the climate-controlled cab. No matter how you configure the new 5E Series, impressive can-do comes built right in.

Explore the new 5E Series and discover for yourself exactly what it means to be born to work.

### Born to work. On your property. Within your budget.

#### 45–75 horsepower 5E Series

Trying to find the perfect fit for your property or operation? It's as easy as climbing in to the seat of the 45 to 75 horsepower 5E Series. You want options? You've found them. You can choose 2WD or MFWD. An open station, or a climate-controlled cab (55 - 75 hp models). The 9F/3R SyncShuttle™ Transmission or the 12F/12R PowrReverser™ (55 - 75 hp models). Why so many options? Because a job well done starts with the right tools. And with the 5E Series, it's easier than ever to customize your machine to fit your needs, AND your budget.

Handle rotary cutting chores, tackle loader work like moving gravel or dirt, or choose one of hundreds of compatible implements and attachments like post-hole augers, rear blades, box blades, wood chippers, or land planes, and get to work. Your property will thank you.

Capable without compromise ... That's what the 5E Series is all about.

Choose the climate-controlled cab option (not available on 5045E) and work in comfort all year long. Ergonomic seat and easy-to-reach pedals, levers and joystick leave you relaxed and in control, even after hours of operating. While new integrated 12V charger keeps your devices running all day long.

### Born to work **stronger**

#### 85–100 horsepower 5E Series

Step up to the 85 to 100 horsepower 5E Series and you're getting a tractor with serious muscle and capability. These rugged machines can handle just about anything on your farm or your property; from heavy-duty loader work, to hay-making, to property maintenance chores, rotary tilling, and everything in between. We now offer more versatile speed selection with the 24F/12R PowerReverser™ transmission which allows you to shift from hi to lo with the ease of buttons. Plus, you'll get the choice of our comfortable open operator station, or the cab configuration for year-round productivity.

Get a clearer view of the task at hand with the exhaust stack now located behind the cornerpost of the cab (available on 55–100 hp models with cab). Plus, the 85-100 horsepower 5E models boast an improved control layout, access to SCV levers and generous console storage space.

### Born to work **stronger**

# Powerful engineering... from the inside out.

At the heart of every 5E Series tractor you'll find a powerful yet efficient John Deere PowerTech™ turbocharged diesel engine. The 3-cylinder or 4-cylinder engine (depending on choice of horsepower) both feature a wet sleeve design for better heat dissipation and a standard rated operating speed of just 2100 RPM for an engine that produces reduced noise, vibration and wear and tear over the long run. And with up to 100 available horsepower, the 5E Series can tackle just about anything on your chore list.

Choose the 45–75 horsepower 5E Series for a simple Final Tier 4 single fluid solution. No extra fuel additives, and no need to "arm" a regeneration system. That means you can run your tractor just like you always have and know it's working more efficiently than ever ... and with compliant emissions reduction.

Early mornings? Late evenings? No problem ... Extra bright halogen headlights and rear work lights come standard on both open station and cab models.

The one-piece tilting hood allows easy access to to service items like the air filter, engine oil checks, and more. Plus, ground-level fluid fills make regular maintenance a snap.

### Born to work **under pressure**

# Load more. Lift more. Do more.

When it comes to hydraulic power and capacity, it's hard to beat the 5E Series. With a rear hitch lift capacity of over 3,200 pounds, lifting and transporting those heavier implements – like rotary tillers and heavy seeders – just became a non-issue. The standard 3-point-hitch allows you to hook up to any Category 1 (with conversion kit) or Category 2 hitch standard-mounted implement. Plus, mid-mount hydraulic remotes allow for easy loader mounting.

Around front, add a John Deere loader for up to 3,548 pounds (1,610 kg) lift capacity<sup>\*</sup> Quik-Park™ capability and self-leveling options. Partner a John Deere loader with a PowrReverser™ Transmission to transform your 5E Series (4-cylinder only) into a lean, green, loading and lifting machine. And now with the factory installed loader prep

package option and stackable mid SCVs, you'll be saving lots of time and money.

Quik-Park loaders attach and detach in just a few minutes, with no tools

With standard high-capacity hydraulics, you can sit back and let your new 5E Series handle the heavy lifting. \*Lift capacity for H240 NSL Loader at full height on 5100E tractor.

#### Born to work **smarter**

## Intelligent efficiency.

The new John Deere 5E Series — our most advanced 5E utility tractors ever. What makes the new 5E Series so advanced? First, you get the option a 24F/12R PowrReverser™ Transmission on 4-cylinder models (12/12 is standard on 5085E and 5100E). No-stop, in-line, forward/reverse shifting makes short work of loading, blading, or any chore with frequent directional changes — while 12 forward and 12 reverse speeds allow you the freedom to find just the right gear for the job. Or go with the standard 9F/3R SyncShuttle™ Transmission\* (3-cylinder only) for proven-reliable performance in any application.

The standard, fully-independent 540 RPM PTO gives you power for all rotary and PTO-driven implements and has been updated with an electrohydraulic actuator for smoother PTO activation. Plus, PowrReverser-equipped tractors benefit from a 540 Economy PTO mode, allowing you to operate with full PTO speeds at reduced engine rpm – saving fuel, lowering engine noise and reducing vibration. For operator convenience, we've relocated the EPTO lever to just behind the seat, well within reach of the seated operator.

No matter which options you choose, heavy-duty components and moving parts designed for high-hour usage translate to unmatched performance and long-term reliability. And that makes the 5E Series a smart investment any way you slice it.

1. 5085E Tractor shown with H240 Loader and 3rd Function Grapple Bucket. 2. 5075E Tractor shown with Canopy and Frontier RC2072 Rotary Cutter.

\*9F/3R only on 45-75 HP models

3. 5100E Tractor shown with H240 Loader and 681 Rotary Tiller. 4. 5075E Tractor shown with Frontier Box Blade BB4172H

#### Born to work anywhere

1. New sloping hood on 5E 4 cylinder. 2. New LCD instrument cluster. 3. New standard sway bars and telescoping draft links. 4. New slide out condenser, radiator screen, tilt-able charge air cooler, and slide out condenser on 4 cylinder cab models.

## Making the best even better.

The new 5085E and 5100E machines have a great new set of features that will help you be get more done in less time.

The new sloping hood, deluxe standard cornerpost exhaust, and raised operator platform on cab models give you up to 3.6 feet of extra visibility in front of the tractor. Better sightlines mean higher operator efficiency and comfort when performing many repetitive tasks with a loader.

With the new LCD instrument cluster, you can see ground speed, PTO speed, and engine hours all at the same time. In addition, you can now view important indicators such as PTO target bar, PowrReverser™ position, hi-lo indicator, and warning lights.

The new slide-out condenser (cab models only), radiator screen, tilt-able charge air cooler, and slide-out oil cooler allow you to quickly access the cooling system components to clean debris—with no tools. If it's easy to clean, it will get cleaned, so you'll never have to worry about an over-heated engine in tough conditions.

Finally, attaching rear implements to the 3-point hitch is now easier than ever. With the new standard sway bars and telescoping draft links, no tools are required to attach or detach implements. That's going to be appreciated when hooking up heavy implements that can match the rear hitch lift capacity of over 3,200 pounds.

## Frontier makes the perfect match

From posthole diggers to food plot seeders to rotary cutters to land levelers, John Deere and Frontier Equipment offer a wide variety of front and rear attachments designed specifically for tractors like the 5E Series. Your John Deere dealer is the exclusive source for the full line of Frontier implements and attachments.

See your John Deere dealer, or visit us online to find out more about our complete line of attachments, including:

Grooming mowers Posthole diggers Tedders Box blades Manure spreaders Wood chippers Wheel rakes Rotary tillers Snowblowers Overseeders Disc mowers Bale huggers Disk harrows Rear blades Arena rakes Rotary rakes Core aerators Bale spears Sickle bar mowers Pendular spreaders Food plot seeders Pulverizers Offset disks Land planes

#### NEW John Deere loaders: Built Tough.

If you're looking for greater lift heights, higher capacity, user-friendly parking and attaching, look to the all-new John Deere H Series Loaders. Built to handle the demands of livestock and dairy producers, commercial and construction operators, or anyone with big-time material-handling chores, the H Series offers more cast-steel components for improved durability and capacity, a lower torque tube for better visibility, and concealed oil lines for a cleaner appearance and less risk of damage.

For owners and operators with less-demanding loader tasks, the 512 Loader offers field-proven performance across a wide range of material-handling applications. Your John Deere dealer can help you choose the right loader for your operation.

# Add more comfort, convenience, security, productivity...

#### Auxiliary work light kit

Increase productivity with our auxiliary work light kit. The round halogen lights mount to the roof of your cab, providing a great source of extra lighting for the front or rear (or both) of your tractor. Includes all hardware and components.

#### Air-ride suspension seat

Ride more comfortably over the longest roads and roughest terrain with an air seat suspension kit. The vertical and horizontal seat suspension lets you work longer hours with minimal operator fatigue. Armrest included. See your John Deere dealer for more details.

#### Power beyond adaptor kit

Provide live hydraulic power to implements that have an open-center control valve. This kit is required for installing a backhoe on your tractor. See your John Deere dealer for more details.

## Dual rear SCV kit with lever controls

Attach a wider range of implements than ever before with our dual rear selective control valve (SCV) kit.
Easy lever controls are included for your convenience.

#### Get peace of mind with PowerGard™

Protect your investment and increase your confidence in purchasing a high-quality John Deere tractor through John Deere PowerGard™ Programs.

The PowerGard™ Maintenance Program is an effective, preventative maintenance program designed to make sure your tractor operates at peak performance, offers exceptional reliability and maintains top residual value.

\*PowerGard Protection Plan extended warranty covers failures due to defective materials or original workmanship of covered components for up to 3 years or 3,000 hours (whichever comes first). Customers have a choice between either the Limited (engine & powertrain) coverage form or the Comprehensive (full-machine) coverage form. See your dealer or www.deere.com (http://www.deere.com/) for details

From sunrise to sunset, you stretch to meet the challenges of your work. As you do, you can depend on John Deere Financial for flexible financing.\* We know the landscape you work in. And, with a relationship rooted in understanding and trust, we're committed to meeting your unique needs.

Day in and day out we're here for you.

\*Subject to John Deere Financial approval and dealer participation. See dealer for details.
